

McHACKS

Sponsorship Package

2022

Dear potential sponsor,

Canada's favourite hackathon is back for round nine on **January 21-23, 2022**! We are excited to host McHacks 9 virtually, connecting hackers, mentors, and sponsors like you from all around the globe. Over 36 hours, the best and brightest students from around the world will create, code, and collaborate to build the projects of their dreams. We want you to be a part of this incredible experience.

What makes us different?

McHacks is McGill University's preeminent student-organized hackathon and one of the largest hackathons in Canada. Based in Montreal, we take pride in the diverse and multilingual community of student hackers that we attract. We welcome hackers from all levels of study - from high schoolers to undergraduate and postgraduate students - and we're working hard to uphold our values of inclusivity and support our hackers and sponsors throughout the event in whatever way we can.

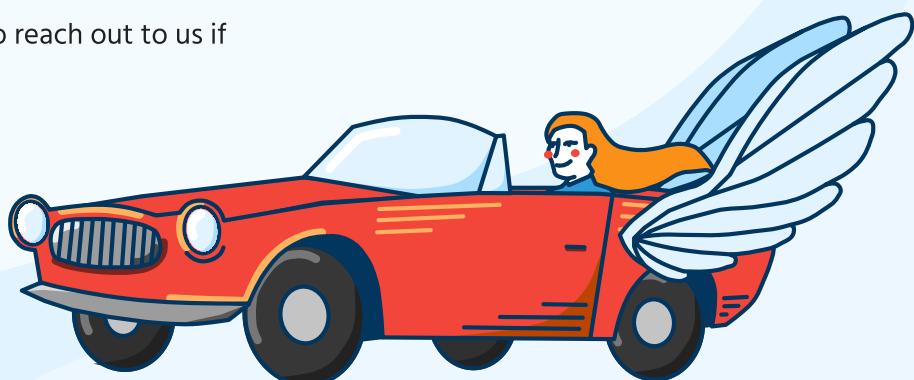

What can I gain from McHacks?

Branding: Expose your brand to up-and-coming developers and top hackers in the tech community. McHacks historically welcomes students not only from McGill but also prominent North American institutions such as Waterloo, UofT, and NYU - when you showcase your brand at McHacks, all of Eastern North America is your stage.

Recruitment: During McHacks, you'll have direct access to all of our student developers. You'll be able to meet with our first-class talent and fill your internships and full-time positions.

API Demos & Testing: Put your products and APIs to the test in the hands of hundreds of curious and innovative hackers. Challenge their limits and receive valuable first-hand feedback.

McHacks isn't just an event for hackers, it's an event for you. Our team will work closely with you to ensure that all of your needs and wishes are met, and that the experience is worthwhile. Feel free to reach out to us if you have any questions!

McHacks testimonials

Mchacks gave me the chance to meet many creative programmers, learn from them, see their amazing ideas, and push my own creative thinking. Overall it was great fun and a very educational experience, definitely excited to comeback next year

Stephen Schneider, Rochester University

It's a great opportunity to connect with the next generation of techies, find out what motivates them and let them know that Manulife is up to something: creating leading-edge technology to be a leader in the Financial/Insurance tech sector

Thierry Leroux-Demers, Principal Enterprise Architect at Manulife
